

Polly Model Engineering Limited

Locomotive Designs from Pete Rich

Polly Model Engineering Limited is pleased to announce that agreement has been reached with Pete Rich for the exclusive marketing of his designs and parts for his finely detailed models.

These designs include the GWR Saint, County, Modified Hall, Castle, Prairie and Dean Single and Armstrong 4-4-0 locomotives. The latter two locomotives are currently serialized in the in Model Engineer magazine.

Tender drawings are available for the Churchward tender and drawings are being prepared for the Dean tender.

Though predominantly 5" gauge, Pete Rich has also produced some drawings for 7 ¼" gauge. These include the GWR County 4-4-0 and some tank engines.

We have recently successfully cast both the outside and inside cylinders for the Pete's castle and with all the wheels available, we are gradually building up the small castings for this important model.

Patterns for the Dean/Armstrong are currently being assessed and reworked as appropriate and we expect castings to be available during 2011.

Please enquire for availability/prices of drawings and parts.
